Quarterly Activities Report

- Blina Minerals continued to examine other opportunities since the end of the gold joint venture with Andes Resources. A copper project was investigated in Africa but field due diligence showed that the conceptual exploration model based upon the geological interpretation was not sound and Blina did not proceed further with the project.
- Other gold, cobalt and lithium projects were examined and work is in progress.
- The third monitoring report for the rehabilitated Blina site for the Ellendale alluvial diamond mine was submitted to the Department of Mines and Petroleum and Blina is now awaiting assessment of the report prior to the release of environmental bonds of \$240,000.
- Mr Jay Stephenson was appointed Non-executive Director of the Company following the resignation of Justin Virgin.

- **Project Generation Work**

Blina is actively evaluating the acquisition of advanced cobalt, lithium and zinc projects across a broad range of geographies. All projects are subjected to a rigorous technical, commercial and legal due diligence.

- **Burkina Faso Gold Project**

Blina has taken the decision to withdraw from gold exploration in Burkina Faso following the recent geopolitical challenges facing the region. The local Blina subsidiary is in the process of being liquidated which should be completed in the next quarter.

DISCLAIMER

Information included in this release constitutes forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue” and “guidance” or other similar words, and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate environmental conditions including extreme weather conditions, staffing and litigation

Forward looking statements are based on the company and its management’s assumptions made in good faith relating to the financial, market, regulatory and other relevant environments that exist and effect the company’s business operations in the future. Readers are cautioned not to place undue reliance on forward looking statements.

Forward looking statements are only current and relevant for the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward looking statements or advise of any change in events, conditions or circumstances on which such statement is based.

The interpretations and conclusions reached in this report are based on current geological theory and the best evidence available to the authors at the time of writing. It is the nature of all scientific conclusions that they are founded on an assessment of probabilities and, however high these probabilities might be, they make no claim for complete certainty. Any economic decisions that might be taken on the basis of interpretations or conclusions contained in this report will therefore carry an element of risk. It should not be assumed that the reported Exploration Results will result, with further exploration, in the definition of a Mineral Resource.

COMPETENT PERSONS STATEMENT

The information in this Announcement that relates to Exploration Results was compiled by Mr Robert Jewson, who is a member of the Australian Institute of Geoscientists, and a consultant to Blina Minerals NL. Mr Jewson has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves'. Mr Jewson consents to the inclusion in the Report of the matters based on his information in the form and context in which it appears.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.

Mining exploration entity and oil and gas exploration entity quarterly report

2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
